Our Neighborhood is Our Environment

In 2007, New England's first hydrogen fuel cell bus began service at the CT Convention Center.

In 2008, the LEEDS-certified CT Science Center will open adjacent to the CT Convention Center!

The new Connecticut Convention Center is the centerpiece of an award-winning, brownfield development project that transformed a vacant, 30-acre industrial site into an exciting new riverfront neighborhood called Adriaen's Landing.

From the design and maintenance of our building, to a new online ordering system, we're demonstrating our commitment to the world's environment and to our own Hartford neighborhood. This is how:

- Recycling all cardboard, office paper, glass, aluminum, plastic, trash and cooking oils
- Extensive energy conservation programs for escalators, lighting and HVAC, supported by natural lighting in public areas and motion detection systems in restrooms, meeting rooms, and ballrooms
- Metal halide and low-fluorescent exhibition hall lighting
- Free shuttle bus service on New England's first hydrogen fuel cell bus
- On line exhibitor services to reduce paper transactions
- Non-touch paper towel dispense systems in all restrooms

The Northeast Economic Developer's Association named the Connecticut Convention Center its 2006 Project of the Year!
