

CLEANING, HEALTH & SAFETY

Keeping our guests, associates and our community safe is our top priority. We are closely monitoring government policy changes, Centers for Disease Control & Prevention (CDC) guidelines, government mandates and public health advancements, and we will continue to make changes as necessary or appropriate to our protocols and procedures.

We continue to maintain our superior level of cleanliness throughout the facility, as well as maintaining a focus on high touch points. All Environmental staff are required to go through CDC COVID training. Touchless hand sanitizers are located throughout the building. We have upgraded our cleaning equipment to use a Victory Cordless Backpack Sprayer, Clorox Total 360 and Victory Cordless Handheld Sprayer. These machines have the capacity to cover up to 23,000 sq. ft., killing bacteria in 3 minutes or less. These devices use patented technology to optimize product delivery in even the hardest to reach places.

The Connecticut Convention Center has announced that it has achieved Global Biorisk Advisory Council® (GBAC) STAR™ accreditation, the gold standard for prepared facilities. Under the guidance of GBAC, a Division of ISSA, the worldwide cleaning industry association, the Connecticut Convention Center has implemented the most stringent protocols for cleaning, disinfection and infectious disease prevention in its facility.

All escalators have been outfitted with the Schindler Ultra UV Pro Handrail Device. This device keeps all escalator handrails germ free while in operation.

MERV 13 Ultra X2 air filters have been installed throughout the facility. These air filters will provide superior quality and flow while being capable of containing COVID-19 contaminants. We have also increased our outside air intake as per CDC suggestion.
